Jim-Bud and Civil Rights in 1996 HW 7/19/76

I don't want to give you an evaluation of it because I can't, really. But I have thought of another approach.

I think it should probably await what next steps we take, which can make a very big difference.

When I can I'll be making a list of what we got from them and how much is on Bud.

I think that with all the relevant files they had giving us so vast a proportion on him will make clear that there is deliberate mischief, a virtual conspiracy to commit mischief.

I do not think you should ignore the possibility that this at least in part is aimed at you.

The way around this is to see Green in chambers and put it to her directly, this is what we got, this is how much there is on Bud- and I have enough to be of significance on Atlanta now.

I've been alert to what may be missing. There is incompleteness in what we just received. When I can find the time I'll do the same thing with the earlier less-than-compliance and I'll be putting them all together. We may still find and I'm sure we will find incompleteness. I am sure we do not have Gallagher on her checking of Bud and the committee, for an obvious example. We do not have attachments mentioned, I'm sure.

So, until they comply you have no immediate problem.

You can't be irresponsible on a matter of this nature.

Meanwhile, I think it would be a good idea to make an extra set of what we received in toto from Civil Rights. With the new batch I'd like you to have a set of copies for a while because of what I think Imay be able to get done with the originals. If I do not have the originals of the first batch, that,too. I can gove them back after a while. There is a special need for what are our originals, our clearest copies.

If you have to do any copying - and please do not do any special copying, I would like an extra of the Les Outside Contact and of all those on McMillan, as I think you also should, to have a separate file on them. (They also are not complete.)

On the Les one we may need more. Please make as many as you'd need if you use it in a hurry as an attachment and a couple of extra ones. The cost of doing it is much less than the cost of having to do it in a hurry.

I did understand you on Callahan tonight or today. I felt it best not to be more specific or at all inquisitive. We'll have to wait and see what it really is. This one is sure to come out.

On Gorge's offier of Ray bank records, while I think you may have the answer, I'll take this up with Jerry when I have to write him again. I'm sure none of them gave these to Gorge. We made a bad mistake on that one. It is enough to win a suit with and I'm not giving it to new counsel, whatever it may be.So I also think it best to avoid putting the specifics in the record unless you consider it really necessary. My hunch is that I've gotten through to Jerry enough for him to be awaiting The Word,

The time situation is bad but all but one of the others are very good.

best,
